<p>Citizens, Equality, Rights and Values Programme (CERV)</p> <p>Call for proposals to protect and promote the rights of the child –</p> <p>CERV-2022-CHILD</p>	<p>Objectives:</p> <ul style="list-style-type: none"> Supporting, advancing and implementing comprehensive policies to protect and promote the rights of the child. <p>Themes and priorities (scope):</p> <ul style="list-style-type: none"> This call for proposals will contribute to the implementation of the first thematic area of the EU Strategy on the rights on the rights of the child – Participation in political and democratic life: an EU that empowers children to be active citizens and members of democratic societies.¹² This priority aims at mutually reinforcing efforts undertaken at the European level by the Commission with those happening in the EU Members States. The call aims to strengthen the sustainability and impact of child participation mechanisms (existing or to be created) at local and national level in decision making processes. Therefore in this call, strong involvement of local, regional and national public authorities is essential as it contributes to the sustainability of the results and ensures more systemic changes. This can be achieved by allocating adequate resources for new and existing mechanisms of child participation, through education on citizenship, equality and participation in democratic processes in schools, capacity building for adults on how to engage in discussions with children in a meaningful way and awareness raising and training activities for children. Schools are a natural environment where children can exercise and nurture participatory activities together with their peers and experience the impact of their engagement on their daily lives. There is already a wealth of good practices on establishing school advisory boards, councils or national school student's councils.¹³ Therefore this call also targets schools to support their efforts in creating safe, nurturing and meaningful environment and involve children in the school's daily life and decision making. Awareness on children's rights is a precondition to ensure effective and meaningful participation of children, in particular to ensure the right of the child to be heard and listened to. Children, professionals working with and for children, the media, the public, politicians and policy-makers need to know the rights of the child to effectively implement the right to be heard. 	<p>EU grant applied for cannot be lower than EUR 75 000.</p>	<p>Deadline: 18 May 2022 – 17:00:00 CET (Brussels)</p> <p>https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/cerv-2022-child</p>
